Regan L. Bourland

he/him/his

I have over twenty years of professional experience in design, technical architecture, and web development. I'm a full-stack developer with a passion for gorgeous user interfaces, amazing user experiences and flawless accessibility. I love to focus on modularization and efficiency of both design and technical solution. I also have a BA in Visual Communications and many, many hours of continuing education.

My family and I intend to move to Denver in 2026. Once we move, I can no longer work at ProAthlete for legal reasons. Therefore, I'm looking for a position that is: fully-remote or local to Denver, full-time employment, and starts as soon as possible.

Relevant Professional Experience

- (*2021 — Current*) **Web Developer; ProAthlete Inc.; Kansas City, MO**

  Front-end developer on a smaller team. Plan accessibility, user experience, A/B testing, design integration, and development of all e-commerce websites and several internal business solutions.

  Common Stacks: .NET Core MVC, Vue, Javascript ES6, jQuery

- (*2019 — 2021*) **Senior Developer; Diamond Merckens Hogan; Kansas City, MO**

  Front- and back-end web development. Met with clients, creative teams, and dev/IT team to make sure static, CMS, and e-commerce sites were in fully functional, user friendly, and accessible.

  Lead AEM Developer (contract); created and managed any and all AEM projects.

  Senior Developer (full-time); same as above, but with all projects - whether those were AEM, Wagtail, Wordpress, or otherwise.

  Certification: Adobe Experience Manager 6.0 Expert Developer
  Previous title at DMH: Lead AEM Developer
  Common Stacks: Java, ES6, HTL/Sightly, Javascript ES6, jQuery, python, Django, PHP

- (*2018 — 2019*) **User Experience Architect; Artisan Technology Group; Kansas City, MO**

  As the face of user experience at Artisan, I worked closely with our partners and clients to improve messaging and strategic tactics throughout their brands and systems. Beginning with market research and in-depth business discovery I organized, planned, designed, prototyped, and developed custom interfaces and marketing materials for a wide variety of technology applications.

  Accreditation: Amazon Web Services Business Professional
  Common Stacks: AWS, .NET, Node, Angular, React

- (*2014 — 2018*) **Principal Developer; Intouch Solutions, Inc.; Overland Park, KS**

  I worked closely on a daily basis with architects, directors and the VP of Development Services on complex and/or high-profile projects. I'm an Adobe Experience Manager Certified Expert developer, and often acted as liaison with technology vendors and client IT groups. While my primary focus was always implementation and development, I worked with architects on documenting standards and mentoring team developers on specific technologies to ensure long-term growth of the business.

  Certification: Adobe Experience Manager 6.0 Expert Developer
  Previous titles at Intouch: Developer (contract), Senior Developer, Development Team Lead, AEM Development Lead
  Common Stacks: .NET MVC, Java, Angular, ES5, HTL/Sightly, jQuery

- (*2010 — 2014*) **Web Development; Marketing; Softek Solutions, Inc.; Prairie Village, KS**

  Design and development of the websites, social networking and general online presence of SSI with the occasional print design when needed.

  Common Stacks: PHP, .NET MVC, jQuery

- (*2009 — 2010*) **Web Development; Creative Marketing; Liquid Soap Products; Lee's Summit, MO**

  Design and development of the websites of LSP and its subsidiaries; Ultra International and Custom Solutions, Inc. with the occasional print design when needed.

  Common Stacks: ASP, PHP, jQuery
